

■ ENERGY

**Engineers you can trust**

**B**ERNARD is a company which meets the challenges of today by engineering for the future. We consult, design and realise durable and visionary projects worldwide. We are orientated to providing our clients with the best technical and most economic approaches, by providing innovative, fair and sustainable solutions.

Founded in 1983, BERNARD is an independent engineering consultancy. Through our highly-qualified and motivated employees, we meet our clients' expectations by providing interdisciplinary engineering in the Energy,

Industry, Infrastructure and Mobility business units. Our services include technical and commercial assessments, as well as consultancy for all phases of design and project implementation. In addition, the specialised companies within the BERNARD Gruppe offer cutting-edge solutions that go beyond conventional engineering services.

Our employees are the key to our success. They ensure our reputation, our innovative approach and the quality of the services provided by BERNARD Gruppe companies.

## ABOUT US

## ENERGY

---

### AREAS

- Power Plants and Grids
- Electrical Engineering
- Pipelines

### SUSTAINABILITY

A reliable and sustainable energy supply is an issue that concerns many levels of society. Current trends such as electromobility or digitization will also present us with new challenges in energy supply in the coming decades.

### ALL SERVICES OUT OF ONE HAND

For more than 30 years the BERNARD Gruppe has been successfully active regionally and worldwide in the consulting, design and implementation of plants for the generation, transport and storage of energy sources. We also plan the networking of different systems and intelligent control mechanisms in order to operate complex infrastructures safely. Our service portfolio includes services in the field of pumped storage and run-of-river power plants, high-voltage networks and converter stations, overhead lines and safety engineering for rail transport, pipelines for oil, gas and water, electrical engineering infrastructure and radio systems (Tetra, GSM-R, FRMCS, etc.).

### OUR SERVICES

- Measuring and control technology
- Structural and civil engineering
- Control and safety technology
- Automation technology
- Sensors and actuators
- Railway engineering
- Control centers
- Radio systems
- Rail systems
