Engineers you can trust

BERNARD is a company which meets the challenges of today by engineering for the future. We consult, design and realise durable and visionary projects worldwide. We are orientated to providing our clients with the best technical and most economic approaches, by providing innovative, fair and sustainable solutions.

Founded in 1983, BERNARD is an independent engineering consultancy. Through our highly-qualified and motivated employees, we meet our clients' expectations by providing interdisciplinary engineering in the Energy,

Industry, Infrastructure and Mobility business units. Our services include technical and commercial assessments, as well as consultancy for all phases of design and project implementation. In addition, the specialised companies within the BERNARD Gruppe offer cutting-edge solutions that go beyond conventional engineering services.

Our employees are the key to our success. They ensure our reputation, our innovative approach and the quality of the services provided by BERNARD Gruppe companies.

ABOUT US

INDUSTRY

AREAS

- Custom Development and Manufacturing
- Dynamics and Monitoring
- Applied Research

ALL SERVICES OUT OF ONE HAND

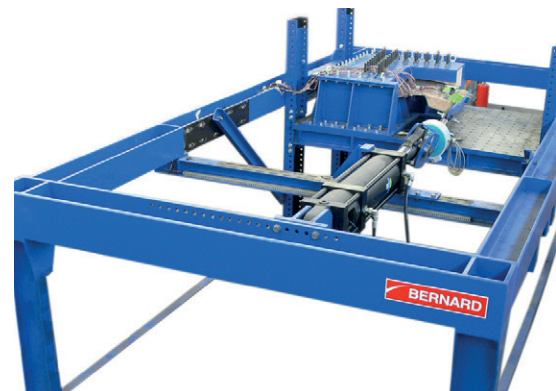

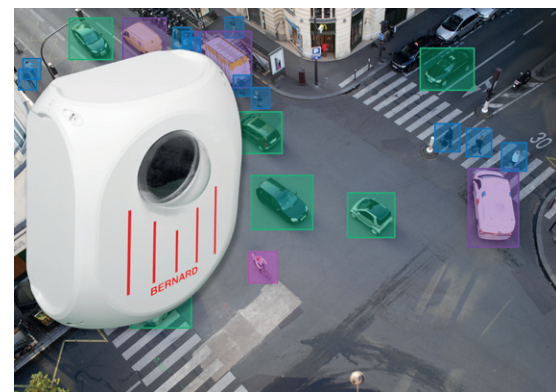

The BERNARD Gruppe designs, develops and supplies individual specialized solutions. Our experts cover the fields of measurement and control technology, monitoring, electronics, electrical engineering, optics, optoelectronics, mechanical engineering, mechanics and physics. In addition, we are working with artificial intelligence in some of our projects, in particular with deep learning algorithms. This enables us to realize promising projects in the fields of Smart City, Industry 4.0, Internet of Things and other application areas with Big Data.

PRODUCTS

Our developments include the BERNARD Structure Analyser, which determines the internal load-bearing capacity of structures and thus prolongs their service life, and the BERNARD Mobility Analyser, which detects flowing and stationary traffic, enabling automated traffic counts to be carried out and reducing the amount of traffic searching for parking.

CUSTOM DEVELOPMENT

Our custom development department benefits from the broad expertise and many years of experience in our team. Fields of application are, for example, vibration damping systems, test facilities for the aircraft industry and construction technologies for luge tracks. In addition to system integration, we also offer support services and training, and we are a certified National Instruments Alliance Partner.
