Engineers you can trust

BERNARD is a company which meets the challenges of today by engineering for the future. We consult, design and realise durable and visionary projects worldwide. We are orientated to providing our clients with the best technical and most economic approaches, by providing innovative, fair and sustainable solutions.

Founded in 1983, BERNARD is an independent engineering consultancy. Through our highly-qualified and motivated employees, we meet our clients' expectations by providing interdisciplinary engineering in the Energy,

Industry, Infrastructure and Mobility business units. Our services include technical and commercial assessments, as well as consultancy for all phases of design and project implementation. In addition, the specialised companies within the BERNARD Gruppe offer cutting-edge solutions that go beyond conventional engineering services.

Our employees are the key to our success. They ensure our reputation, our innovative approach and the quality of the services provided by BERNARD Gruppe companies.

ABOUT US

INFRASTRUCTURE

AREAS

- Geotechnical and Tunnel Engineering
- Structural Engineering and Design
- Environment and Spatial Planning

SUSTAINABILITY

A modern infrastructure is important for the positive economic development of a city, a region or a whole country. The people benefit from it, which is reflected in their satisfaction. It is our goal to meet the high demands of our clients. With great enthusiasm we face your challenges of solving complex interdisciplinary design tasks and implementation processes in compliance with legal, economic and ecological framework conditions. In doing so, we rely on a large number of projects at home and abroad.

ALL SERVICES OUT OF ONE HAND

The BERNARD Gruppe develops and implements infrastructure solutions. In the design of bridges, tunnels, buildings, civil engineering and other infrastructure, we have many years of experience in the implementation of major projects. However, we not only apply our expertise in large-scale construction contracts, we also deliver tailor-made and individual solutions for smaller projects with full commitment.

OUR SERVICES

- Implementation support (construction management, construction supervision, project management)
- Assessment of the effects on humans and the environment
- Detailed design (tender design, execution design)
- Assessment of the subsoil (geology, geotechnics)
- Supervision of authority procedures
- Design of the structures
