

■ ENVIRONMENT & SPATIAL PLANNING

**Engineers you can trust**

The environment and the use of space play a central role for promoting climate-friendly social interactions and cooperation.

In order to implement the objectives of the EU, federal and state governments, we provide complex design solutions in which environmental planning and technical engineering services are tasks of equal importance.

Environment and spatial planning tasks require a high degree of interdisciplinary work. The BERNARD Gruppe offers comprehensive design

services from a single source. As an example, climate neutrality and public health protection are primary objectives when preparing mobility concepts, supervising building renovations or constructing and operating infrastructure projects.

The BERNARD Gruppe has many years of experience in both national and international projects.

We support you in complying with the legal, technical and social requirements of your projects.

## ABOUT US

---

# ENVIRONMENT & SPATIAL PLANNING

---

## INTERDISCIPLINARY

We support you from the initial environmental survey to the permit application and subsequent execution design and implementation phases. Working together with other specialist disciplines, we are able to provide a full range of services to the highest quality.

## CONSULTING AND COORDINATION

For infrastructure projects, we prepare complete environmental impact assessments (EIAs) and expert opinions, and we undertake the coordination with authorities.

## STAKEHOLDER MANAGEMENT

Proactive stakeholder management is a key factor for success. The identification of stakeholders and the development of viable solutions promote the acceptance of your project. For this purpose, we provide moderation and mediation procedures, we establish contacts with ombudspersons and we organize public participation events.

## OUR SERVICES

- Coordination of environment and spatial planning, environmental project management
- Environmental construction monitoring, site supervision with regard to soil science
- Public relations advice, contact with mediators and ombudspersons
- Strategic environmental assessments (SEAs)
- Environmental impact assessments (EIAs)
- Mapping of plant and animal habitats
- Landscape conservation planning
- Tender and execution design
- Biodiversity assessments
- Feasibility studies
